

Pranay Kumar

Computer Engineering undergraduate specializing in MERN Stack Dev, Web Dev, Agentic AI | ✉ pranaykumar302@gmail.com

☎ +91-8828158085 | [in Pranay-Kumar](https://www.linkedin.com/in/Pranay-Kumar) | Jodhpur

SKILLS

Languages: Python, C++, Java, SQL, R, MATLAB

AI / ML: TensorFlow, Scikit-learn, NLTK, Agentic AI, GenAI, RAG, Multi-Agent Systems, n8n

Backend & APIs: Flask, Node.js, REST APIs, Microservices, Kafka

Frontend: React, HTML5, CSS3, Javascript

Cloud & Data: AWS, MongoDB, MySQL, Firebase, Docker, Supabase

Tools: Tableau, VS Code, Android Studio, Git, Eclipse, AutoCAD

EXPERIENCE

Tech-Biz Solutions | MERN Stack Intern (Jan 2026 – April 16, 2026)

Built and deployed scalable MERN web applications, collaborating with development teams and industry mentors to deliver automation-focused solutions for TaskAuto App and TV19 Web App.

PROJECTS

Revora – Dynamic Pricing & Demand Intelligence System

- Built Revora, a MERN + Python ML pricing intelligence system that analyzes sales data, simulates demand/revenue/profit impact, and generates explainable guarded price recommendations.
- Processed 157K+ decision rows with 86.28% ML accuracy, integrating data-quality checks, pricing guardrails, dashboards, exportable reports.

TV19 – Full-Stack News Portal & Admin CMS

- Built a MERN-based news platform with automated RSS ingestion, category feeds, search, bookmarks, comments, polls, and a JWT-secured admin CMS.

TaskOps – Real-Time Task & Project Management Platform

- Developed a MERN productivity app with role-based dashboards, Kanban task tracking, team/project management, Socket.IO chat, real-time notifications, and OTP-based 2FA.

AI-Driven Student Engagement & Affective State Monitoring System

- Engineered a real-time AI engagement monitoring system using webcam-based attention, yawning, and drowsiness detection (EAR, MAR, head-pose tracking), enabling continuous remote focus analysis.
- Integrated a smart doc reader, adaptive quizzes, flashcards, analytics dashboards, and AI chatbot to correlate attention with quiz performance; successfully pitched at **Google Mumbai** with strong industry validation.

Kafka-Based Distributed Seat Booking System

- Orchestrated event-driven microservices using Kafka, Flask, and Docker, achieving sub-1s latency under 1000+ concurrent users with Artillery.

AI for Agriculture & Food Redistribution of Surplus

- Developed a Plant disease detection system (92% accuracy) with multilingual aid, NGO matching, enabling ~30% faster redistribution.

RESEARCH PAPER

- IEEE- Real-Time Multimodal AI Framework for Student Engagement ([Published](#) – May'26)
- NTAI- Secure Iris Recognition with Post-Quantum Cryptography (Under Scrutiny)

EDUCATION

SVKM's NMIMS, Navi Mumbai B.Tech
Computer Engineering 2026 GPA: 2.7 / 4
(as per sem 8)

Bombay Scottish School, Powai
X(2019): 82.20%

PACE Science and Junior College, Powai
Science (PCM)- XII(2022): 83.00%

CERTIFICATIONS

- **Google Cloud** – GenAI Apps with Gemini & Streamlit, Multi-Agent Systems
- **AWS** – Cloud Architecture
- **ActiveLoop** – Advanced RAG with LangChain & LlamaIndex
- **Skillsoft** – CEH v13: SQL Injection
- **Forage** – Deloitte Technology & TATA Data Visualization

COURSEWORK

Artificial
Intelligence
Distributed
Systems
Database Management System
Cloud Computing
Data Structures and Algorithms
Calculus
Complex Variables &
Transforms
Cyber Security
Developing Android and Web apps
Software Engineering

INVOLVEMENT

Research Head – Placement Committee
Core Member – Infinix
Member – Marketing Club

LANGUAGES

English, Hindi
